

iN2-SDLC-CABLE:

This Cable is used to connect a device to a NEMA TS-2 traffic cabinet's SDLC bus.

Features:

- Length: 6 feet
- Two male connectors for direct connection from an SDLC device to an SDLC bus.
- Latch block clips on connector ends
- External logic ground (GND) wire provided to ensure Polara's iCCU-X has a connection to the same logic ground used by the traffic controller.
- Cable rated to 300V RMS and 80°C

Dimensions are in inches.
