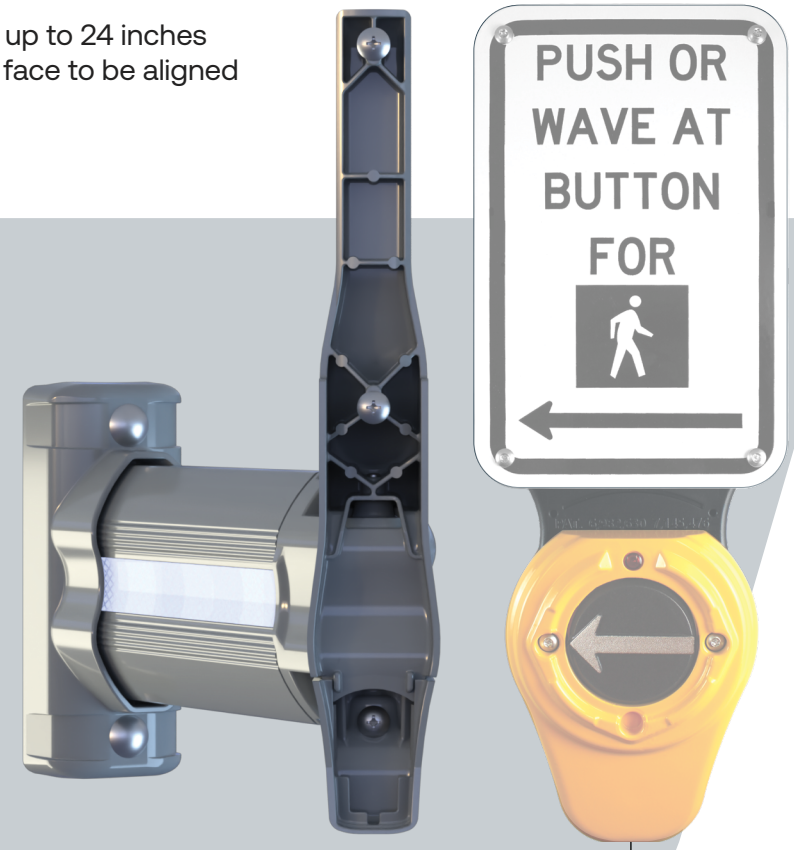
APE

Articulating Ped Extender

Precisely positions iDS/iNS and iDX/iNX push buttons up to 24 inches from the pole, with articulation that allows the button face to be aligned directly with the crosswalk.



Compatible with iDS/iNS and iDX/iNX models

Optimized, compliant placement

Achieves PROWAG-recommended push button placement and crosswalk alignment without installing a new pole.

Avoid trenching and disruption

Extends from existing poles to reduce trenching, new foundations, and invasive construction.

Clean, integrated appearance

Articulated design with concealed wiring maintains a professional streetscape consistent with Polara push button systems.

3 YEAR LIMITED WARRANTY
